DBM Contractors Goes Global

DBM Global Services Created to Connect U.S.A. & Worldwide Markets

FEDERAL WAY, Wash. – August 25, 2010 – Donald B. Murphy Contractors, Inc., (DBM), an industry leader in heavy civil and specialty geotechnical construction, has recently created an international trading and consulting division, DBM Global Services, to support its efforts to expand its core construction activities overseas. The new division is working in key international markets that are experiencing strong economic growth including Canada, China, Southeast Asia, the Middle East, Africa and South America. DBM Global Services will also seek, qualify and represent complimentary U.S. construction companies overseas as well identify unique opportunities to represent foreign companies and/or organizations in the U.S.

Michael B. Murphy, representative of DBM Contractors, Inc.'s family ownership, and chairman, created the division in an effort to identify attractive design/construction projects overseas for DBM as well as offer the company's extensive overseas network to companies seeking opportunities offshore.

"DBM Global Services will fill an underserved niche in the global project spectrum, by targeting specialized projects and subcontracts for the company in the \$10-15 million range, projects that are too small to attract the attention of the giant multinational firms but which still require world class engineering and construction expertise," said Murphy.

Given its extensive network of strategic partners, DBM Global Services is in the unique position to assist U.S. organizations in entering and expanding in overseas markets. Therefore, DBM Global Services serves as a new-to-market consultant and/or corporate representative as well as a resource to access national and foreign buying authorities, product and service providers and sales/distribution channels. The new division is comprised of seven business units with design/construction being the priority industry. Other services include security/military, aviation/aerospace, high technology, development, PR/communications and special projects.

For more information about how DBM Global Services can assist your company or organization in entering domestic U.S. and international markets, please access the division's new website address as www.dbmglobalservices.com or contact the DBM Global Services Business Development Manager: at 253-405-4032 or Cmead@dbmcm.com

About DBM Contractors Inc.

Donald B. Murphy Contractors, Inc., (DBM), www.dbmcontractors.com is an industry leader in heavy civil and specialty geotechnical construction. For more than 60 years DBM has earned a reputation for performing difficult and diverse design/build projects on highway systems, as well as commercial and industrial projects throughout the western United States, including Alaska and Hawaii. The company's diversity allows it to work on projects of every imaginable size and scope for both public agencies and private enterprise. DBM attributes its success to working as a team with its project partners and clients. In addition, the company equips its personnel with leading edge construction technology and tools. DBM's engineers continually apply new technologies and specialty methods that provide ground breaking solutions to meet or exceed its clients' requirements and expectations.
